LS Simple[™] Data Center Solution

Traditional concerns of data center stakeholders are keeping their applications running and their networks scalable, available, and secure. However, over the last five years, demand for processing power has surged and server/storage equipment densities have increased dramatically. It has become increasingly difficult to specify cost-efficient power and cooling solutions that keep up with new applications.

Technology evolution in the data center is challenging IT managers to effectively budget and develop reliable, high-performance, secure, and scalable network infrastructure. Server consolidation through virtualization, the growing density of network storage systems, and the bigger and multiple workloads allowed by multicore architectures all drive demand for higher-bandwidth network connections.

Leading-edge LS Simple™ Data Center Solution makes your mission-critical complicated business simple to superior performance and trouble free networks.

Performance

World Slimmest Copper Category 6A cable solution

Superior transmission in 6 high-connection system configuration

10Gbps above with OM3, OM4 fiber solution Low-loss MTP solution

100% assured transmission performance in factory site by Pre-terminated solution

Easy installation & Save time

Reliability

25-Year Warranty Program by cabling business for decades (Technical Support & Certified Installer Training)

Design/Installation/Operation in accordance with International Std. (TIA-942)

Optimized Cabling Infra with Intelligent Infrastructure Management System (I2MS)

Flexibility

Module type products which are convenient to MAC (Move, Add, Change)

Optimized HD racks safely accommodating Network Equipment with various accessories

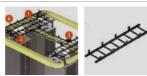

Raceway supporting quick installa¬tion & stability of cabling

Modular type rack package enables flexible expansion and high energy efficiency LS Simple[™] provides the data center solution fulfilling efficient cabling management and Green-IT infra by optimized deployment of rack & cabling, which leads to reliable and stable network service.

LS Simple™ Data Center Solution

Copper Cabling System

Overview

LS Simple™ Category 6A Copper Cable is designed for high performance data transmission. This enables user to transmit 10Gbps above data and suit to design on cabling to cover from equipment zone to patching zone.

LS Simple^{$^{\text{IM}}$} Ultra-Super Slim U/UTP Category 6A cable is a special development to support 10Gbps networking within dense and short length environments of data center. It complies with ANSI/TIA-568-C.2 and ISO/IEC 11801 for channels of Max. 70m or permanent links of max 60m when used in combination with LS Simple^{$^{\text{IM}}$} Category 6A connectors.

Features & Benefits

- LS unique Segmented Shield Technology applied to mitigate Alien Noise.
- Support Max. 70m channels or permanent link of max 60m (Ultra Super Slim Cable)

Space Efficiency & Mitigation from Alien Noise

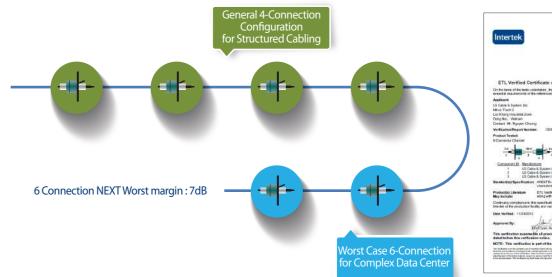

| 6 Bundle Diameter | 27mm | 21mm | 17.4mm |
|-------------------|------|------|--------|
| Surface | 100% | 60% | 42% |
| Channel Length | 100m | 100m | 70m |

Stable Performance & Sufficient Electrical Margin

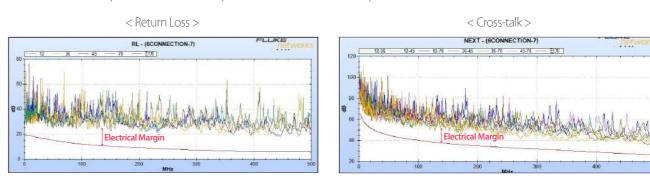

• Extended 6-Connection Channel Performance, 3rd Party Certification of Super Slim Cat.6A

ETL Verified Certificate of Conformance Number: 10089203CRT-002a

On the town of the best unchange of the second o

• Stable 70m channel performace of ultra super slim C6A cable with mini patch cord

• The 70m channel link of ultra-super slim Cat.6a and 30AWG slim patch cords have a sufficient headroom performance for stable service of data center

LS Simple™ Data Center Solution **LS Simple™** Data Center Solution

Copper Cabling System

High-Density Patch Panel

Overview

LS Simple™ High-Density 48-port per 1RU Horizontal or Angled Empty Panel are optimized solution for high-density data center application.

It's cost-effective way to increase rack space utilization by eliminating the needs of accessories such that horizontal management etc. and is conveniently manageable by reduced bend radius specification.

Features & Benefits

- •Two types 48-port/RU patch panel supports(Flat/Angled)
- Various environment supports by jack with dust proof slide door Exact & Fast IDC termination by Easy Tool
- Efficient maintenance by individual jack type panel installation

Space Saving

Easy & Reliability IDC Connection

Easy tool enables installers to not only reduce installation time but also increase performance reliability with precise IDC punching.

Copper Cabling System

Slim & Mini Patch Cord

Overview

LS Simple™ Category 6 or Category 6A mini patch cords are optimized solution for dense and short data center patching environment with 3.3mm(Cat.6) & 4.5mm(Cat.6A). Of course this solution also meets the ANSI/TIA-568-C.2 and ISO/IEC 11801 standard up to 5m length.

LS Simple™ Mini Patch Cord reduces rack vertical cable management capacity and don't obstruct air flow in rack. It maximizes the energy efficiency.

Features & Benefits

- 26AWG(General) & 30AWG (Mini) Stranded Wire
- Factory terminated and 100% tested
- Superior transmission performance & Easy handling by small OD
- Security enhancement & easy-plug in/out by dedicated turning boot technology

Small bending radius

| AWG | Cord O.D(mm) | Bend Radius(R, min) |
|------------|--------------|---------------------|
| 26AWG | 6.0mm | 24mm |

LS Simple™ Data Center Solution

Fast-Net[™] Solution

Pre-terminated Fiber Cabling

Overview

LS Simple Fast-Net[™] MPO/MTP solution is pre-terminated solution which means it can easily expand or relocate systems without relocating patch cords and cassette. Therefore it can be applied to maintenance of currently operating solution to respond flexibility to the customers who consider physical configuration, space-efficiency and future scalability.

By providing pre-terminated product in the factory, LS Simple Fast-Net™ MPO/MTP solution can guarantee high performance & long link length as a result of enhanced insertion loss and decrease of resistance. Also it can reduce human effort when terminating on site with no needs of special tools to terminate optical cables.

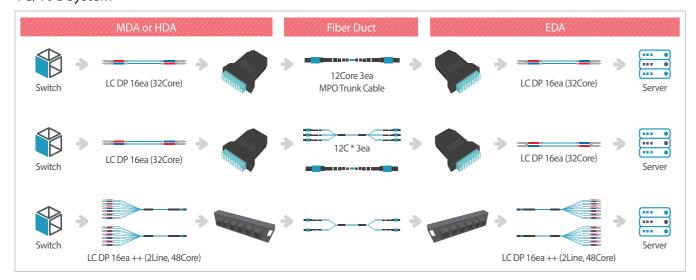

Features & Benefits

- High-density connection with multi-core (up to 24-core) support
- Class OF-300 channel support

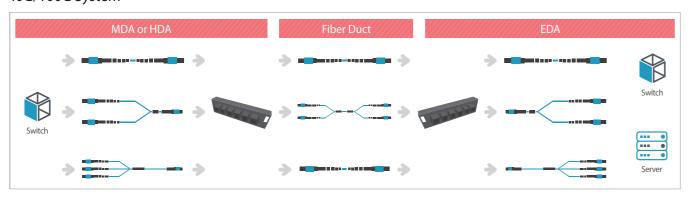

- Push-pull type connecting for easy & fast installation
- 40/100Gbps parallel transmission (IEEE 802.3ba) support solution

Fiber System Configuration

1G/10G System

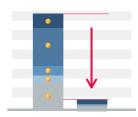

40G/100G System

Benefits

Time Save & Easy Install

Fast-Net™ Solution saves installation time drastically compare to traditional cabling way

Saving Patching & Cord Arrangement
 IDC's Connection (Termination)
 Saving the test time

Saving the test time Labeling Saving time of Pulling Cable

Maintenance Price down

Fast-Net™ FFiber Solution saves cabling duct space and doesn't need fiber connection so decrease human resources and fault

LS Simple™ Data Center Solution **LS Simple™** Data Center Solution

Fast-Net[™] Solution

Pre-terminated Copper Cabling

Overview

Simple Fast-Net™ copper pre-terminated solution is factory terminated, providing the quality required to support your channel requirements. It offers a high performance & stable six bundle cabling.

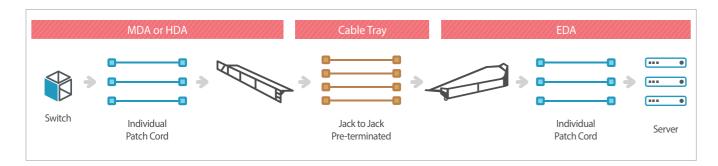

Simple Fast-Net[™] is ideal solution for IBS or Data Center building because it doesn't need to punch down for IDC connection and is easily maintained by detachable module type solution. So it's possible for quick cabling and saves the installation time up to 80%.

Features & Benefits

- Easy Installation by 6 bundle All-In-One structure
- 100% factory terminated & tested

- Customized cable manufacturing & labeling
- Design to prevent kink with central filler

Data Center Rack

Network & Server Rack

Overview

Data Center needs an optimized cabling environment for services. Network rack packages are designed for high density cable data circumstances by providing special VCM. The LS Simpletm meet TIA/EIA 310-D standard and 19 inch rack type standard

Features & Benefits

- Steel Frame, 70% Above Perforation
- Dual Door(Customized doors are available)
- Mounting bar: Al

- Load Capability Maximum 1200kg
- 19inch Rack and TIA/EIA 310-D Compliant
- Cage Nut M5/M6 Screw Used.

Containment System

Customized Module Type Rack

Overview

Proposed customized module type rack PKG solution enable data center to save energy and maintaining proper temperature and humidity therefore, best cooling and minimizing consumption of power is feasible.

Also LS containment system provides for scalable and flexible modular rack package system to meet data center future expansion.

Features & Benefits

Customized Modular Way

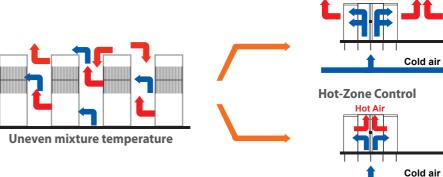

Module type Design

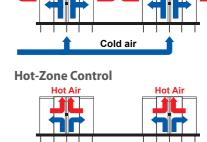

• 6 Racks (2 by 3), 8 Racks (2 by 4), 10Racks (2 by 5) etc. Available on Direction Module type

• Physical Hardware Infrastructure enable to separate on Cold Aisle & Hot Aisle in internal data center for optimized cooling.

Air-Flow Control

The containment provides the maximum efficiency of air condition by deploying racks in most-optimized way in line with LS containment system **Cool Zone Control**

LS Simple™ Data Center Solution **LS Simple™** Data Center Solution

Simple Path™ System

Fiber Tray Solution

Overview

LS Simple Path™ fiber optic raceway system is designed perfectly that routes, isolates and protects fiber optic jumper cords, optical cables from the point of building entry to fiber distribution frames, fiber optic terminal device in safety as well as fiber optic raceway system made of PC/ABS that provides excellent heat stability, weather resistance, halogen free, heat resistance, dimensional stability and flame retardant for environmentally safe products.

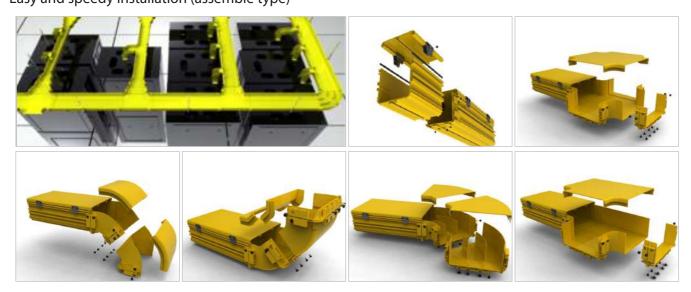

LS Simple Path™ fiber optic raceway system adopts snap-fit connecting way that provide simple easily, compact and quick installation for a various applications without special tools, so it guarantee to save a time, expense and working force of installers.

Features & Benefits

- No need a special tools
- Provides excellent durability

- Easy drop arrangement
- Compatibility with other brand

Easy and speedy installation (assemble type)

Copper Tray Solution

Overview

Copper Ladder Tray provides optimized cabling solution on location and drop point of rack can be combined with fiber raceway to make manageable circumstances.

Circumstances on patching for top of rack can be minimized, and location of rack can be convenient by providing Zero Unit Upper Tray. FDF and copper panel can be installed by installing Upper Tray.

Features & Benefits

- Tray as per location of Rack
- Ceiling and bottom of flooring work
- Non Toxic Materials (RoHS, Halogen-Free)
- Steel and Aluminum Materials
- Zero-U type 19inch installable frame function provide

Easy and speedy installation

Intelligent Infrastructure Management System

SimpleWin[™] Data Center Management

Overview

The LS SimpleWin™ Intelligent Infrastructure Management System drastically speeds up and simplifies site planning, daily network provisioning, as well as maintenance and security. With the ability to keep an accurate inventory of all assets anyplace and anytime, comprehensive visibility is added into the datacenter and workspace facilities providing increased power and flexibility

Features & Benefits

- Real-time error management
- Capture and discover error point and port
- Analyze connection status across
- Helps to track on IP and MAC address
- Work order by portable electronics
- CAD drawing is available

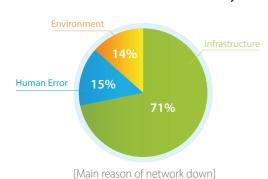

Long-term Operating Cost Saving

It's important not only build a optimized network but also maintain network status optimized because of it's mission critical network system and various function contained server.

SimpleWin™ offers a system platform how to manage network assets and connection in the data-center. The system support plan, modifying, recovery, documentation and suggest best way to manage data-center optimized for a long time.

Minimized Down Time & Enhanced Physical Layer Security

Almost 70% whole network errors come from improper network infra management and among these 46% are considered as physical connection management faults.

It's a almost impossible to find a fault network port if network infrastructure have been unmanaged. It causes long-delayed service break-down and generates extra costs.

SimpleWin[™] offers a management methodology of network infrastructure with various software functions and real time detecting technology of SimpleWin[™]

Efficient Management with real-time software

SimpleWin™ Software offers easy to use software function by 3D drawing based eidetic UI design.

And SimpleWin™ Software monitors network connection status in the real time and dealing with emergency situation by using smart device.

LS Simple™ Warranty Program

Structured Cabling System

Simple LS Simple Warranty LS Simple Warranty Under the service space of the service space

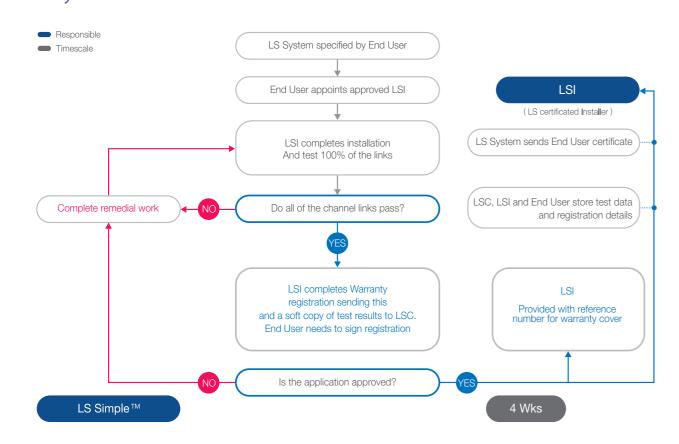

Program Overview

LS Cable & System has a maximum 25 year warranty program to meet the customer's reliability for high quality telecommunication system of enterprise buildings.

The Simple[™] range of solution is supported by a Simple[™] comprehensive warranty

- Unique 25 year application and product warranty.
- •The warranty applied to the network and can be sold as an asset.
- •The warranty is only offered by fully trained LS Integrators.
- •The system is independently inspected by a third party.

Warranty Process

SimpleWin[™] Warranty Program

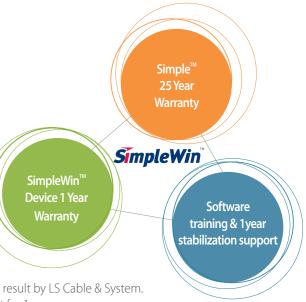

Intelligent Cabling System

Overview

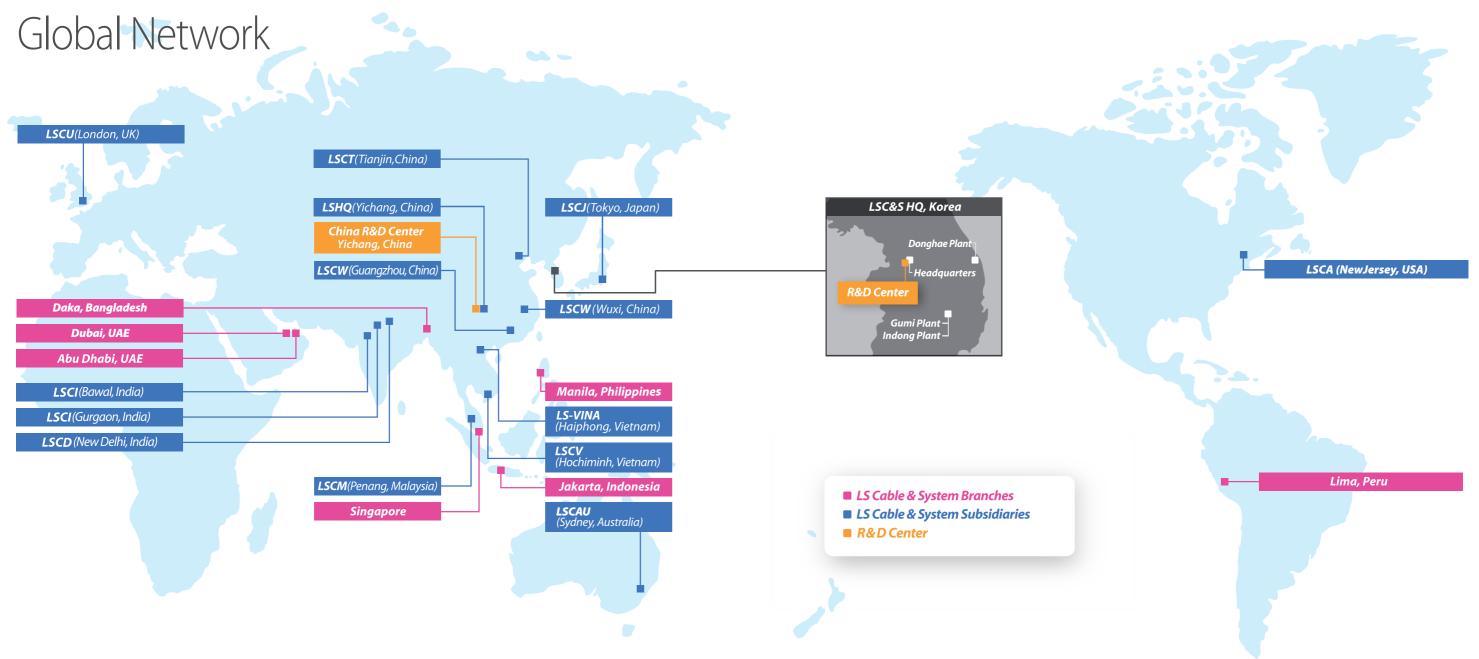

SimpleWin™ warranty program is extended program of Simple™ warranty that considered active device's quality assurance period and settle down stable management of intelligent system.

The SimpleWinTM warranty details are

- SI company should authorized by LS Cable & System.
- The warranty is only offered by fully trained integrator.
- Standard based design should be applied.
- The warranty will be offered after checking design & installation performance result by LS Cable & System.
- Base on warranty LS Cable & System support settle down stable management for 1 year.
- Warranty program is not guarantee for natural disasters and inadequate uses.
